

GPSR Safety Certificate

Product Name: Cuba Fly Mask

Item: SR10283

Intended use:

The fly mask is used to protect the horse's head from insects, especially around the eyes, ears and forehead. It helps to avoid irritation, chafing and stress caused by insects without restricting the horse's vision or freedom of movement. The product is intended exclusively for intended use on horses and may not be used as a halter replacement, transport or fixation device.

Material information:

The product is made of polyester mesh fabric. Polyester is a synthetic material that is characterized by high tear resistance, dimensional stability and durability. The mesh structure ensures optimal ventilation and allows good air circulation to prevent heat build-up. The material is easy to care for, insensitive to moisture and free of animal components.

Security rating:

The product has been tested for safety, material quality and workmanship.

When used properly, there are no risks to consumers or animals.

The product meets the requirements of EU Regulation (EU) 2023/988 (General Product Safety Regulation – GPSR).

Warnings:

- Only use for the intended purpose as insect protection on the horse's head.
- Before each use, check for damage, loose seams, tears or worn-out material.
- If the fly mask is damaged or heavily worn, it must not be used.
- Check the fit regularly to avoid pressure points or chafing.
- Do not put it on too tightly - sufficient freedom of movement in the area of the eyes, ears and nostrils must be ensured.
- Do not leave the horse unattended, especially in the box or pasture if there is a risk of getting caught.
- Do not make any unauthorized changes or repairs to the product.
- Do not use in rain, wet or high humidity if the material is not suitable.
- Clean only according to care label - do not use chemical cleaners, bleach or solvents.
- After cleaning, allow to dry completely before reusing or storing the fly mask.
- Do not store or dry near open flames, heat sources or chemical substances.

Disposal information:

The product is made of polyester mesh fabric and is not biodegradable. The materials can be disposed of with normal household waste if there is no municipal collection for textile waste. Material separation is not necessary in the private sector. Do not burn product residues and do not allow them to enter the environment or bodies of water. Packaging materials must be disposed of separately in accordance with local disposal regulations.
